wissner®

our promise

As a family-owned company, we have been producing didactically useful learning and teaching materials **in Germany** for over 45 years.

In doing so, we focus quite consciously on sustainable and resource-saving materials and develop our own **innovative production technologies**, such as RE-Wood® and RE-Plastic®. We are particularly proud of this.

Both materials are 100% recyclable and free of harmful substances, but still stable, light and very safe. This quality promise is especially close to our hearts, because our products are made for children's hands.

Our learning materials offer children a playful approach to patterns and structures, make learning fun and appeal to different senses. They train three-dimensional vision, can be felt, grasped and compared.

Mathematics can be actively experienced with all senses and learning becomes the most beautiful secondary matter!

We stand by our word and promise you nothing that we cannot keep. Clear and fair rules, transparency, honesty and trust are the basis of a successful cooperation.

Convince yourself!

J. Wißner, 14.12.2024

aktiv lernen

Made in Germany wissner

active learning - see, touch and understand!
Our didactically useful mathematic teaching and learning materials are all under our "Active Learning" guideline.

But what exactly does that mean?
For us, active learning means that we make learning fun and develop products that appeal to different senses. Our teaching/learning materials and learning games train three-dimensional vision, can be felt, grasped and compared, and thus promote the children's individual talents. So that they can take their learning into their own hands and learn actively according to their needs - seeing, touching and understanding.

"Learn actively, have courage to try something, ask questions and discover your talents!"

Our products enable multidimensional learning according to Pestalozzi and can be combined with each other - everything goes with everything!

They are logical and coordinated in terms of size, width, color, volume and weight (1dm3 = 1l = 1kg). This facilitates learning across the board and allows connections to be recognized. And independently developed solutions not only make fun, but also enormously proud!

RE-PLASTIC
infinitely recyclable
For RE-Plastic, we use 100% recyclable polystyrene from post-industrial waste, which we recycle on-site and return to production. Since RE-Plastic can be recycled over and over again, we can maintain this recycling cycle steadily, effectively and responsibly. RE-Plastic is absolutely equivalent in quality, appearance and feel to new plastic granulate. The use of RE-Plastic is a sensible use of resources, ecological and carbon-neutral.

RE-WOOD
sustainable & pollutant-free
Our RE-Wood material is made from shredded wood residues, which are a waste product of wood processing in german production facilities, and a binder in a ratio of 80:20, using pressure and heat to save resources. RE-Wood consists of 100% recycled materials and can be recycled again and again after use. Products made of RE- Wood® are stable, light, saliva-proof and they have a high level of safety in use.

PEFC
PEFC/04-31-3663

RE-WOOD® product cycle

MAG-Pap
full surface magnetic
MAG-Pap is a high quality, magnetic 2-component material. The top side consists of a 1mm thick cardboard made of 100% recycled material, which is bonded with a waterproof, abrasion resistant pressure sheet. This layer is glued on the bottom side with a full-surface and 0.5mm thick magnetic foil. MAG-Pap is ideal for classic blackboards, whiteboards, smartboards and presentation boards.

Muggle stones (100 pcs) in 6 different colors

Learning MATERIAL

These transparent nuggets made of **RE-Plastic** are suitable for first arithmetic, sorting and counting tasks. The flat bottom and curved top create a light effect, which makes the Muggle bricks suitable for use as a magnifying glass and for teaching the basics of optics. This laying material is also ideal as a decorative item
and offers numerous craft and design ideas.

Packed in cardboardbox.
